EFFICACE NANO 7007 Nano Silver H₂O₂ Based Disinfectant

Express Clinics offers State-of-the-art polymer technology in unique product formulations, specifically designed for Aerial Fumigation & Surface Disinfection

Efficace nano 7007 is a food-safe Silver Nano Technology based hydrogen peroxide blend of highest quality standards for efficient sanitation. On reaction with organic matter, hydrogen peroxide decomposes to water and oxygen, leaving no chemical residues. This makes it an ideal choice for treatment of drinking water and food processing industrial application, as it leaves no taint. Hydrogen peroxide is FDA approved for various food industry application. The H₂O₂ component ensures a rapid germ-killing effect and nano silver ensures that the effect is long lasting.

The sanitization system is delivered complete with requisite structure, disinfection enclosures/chamber, hardware, fogging or mist spray units, sanitization chemicals and appropriate controls to ensure smooth and obligatory passage of individuals or groups of the individuals to achieve completely effective sanitization process. Effective sanitization is guaranteed through the usage of chemicals and the fogging systems specially designed to provide 100 % surface coverage over the clothing and exposed body surfaces of the individuals passing through the disinfection chamber.

EXPRESS CLINICS SANITIZATION SYSTEM Model : EC PRM WT

The thermal screening models are based on accurate temperature measurement technology. They provide a visual map of skin temperatures in real time for 25+ people simultaneously and help to timely detect the people with abnormal body temperature and accordingly send an output alarm signal, that can assist the supervisory authorities to take emergency measures. While Temperature Screening Face Recognition is a compact solution which helps in screening the employees for fever along with face recognition-based attendance. In addition to these features access control for the door can also be integrated.

THERMAL IMAGING SOLUTION TEMPERATURE SCREENING & FACE RECOGNITION
